

amendments to the
CODE OF CONDUCT CHARTER
June 5th 2007

AMENDMENT (b)1

Section 2: Registration Policy Principles

7. Registrars must have the technical competence required to successfully perform the different types of actions in the automated systems of EURid (new registration, update domain, transfer domain, trade domain, update contact information, update nameservers etc.) The registrar is obliged to provide the registrant with all registration services offered by EURid. The registrar has to be able to perform all necessary domain name updates and be able to initiate transfers/trades when requested to do so by the registrant (i.e. the current or the new intended holder of the domain name.) **without undue delay.**

AMENDMENT (b)2

Section 3: Service Policy Principles

1. In addition to the obligations set out in Section 2.7, registrars are free to offer any services they see fit additional to the registration services provided by EURid and to determine the price for those services. However, they will always clearly indicate what type of services they are offering, the way those services are bundled or if they are available to the registrant individually, and the prices charged for the services or service complement. They will ensure that the information made available to the registrant is precise, reliable, **not misleading** and complete at all times.

AMENDMENT (b)3

Section 5: Privacy Policy Principles

3. Registrars will not transmit the personal data of their registrants to third parties unless required to do so **by a competent authority entitled to act in a particular case in accordance with applicable law. (Sentence was omitted)**
